MONTHLY WEATHER MAP

METEOROLOGICAL SERVICE, DOMINION OF CANADA

NOVEMBER 1935

TEMPERATURE

The mean temperatures for November were generally below normal throughout Canada except in southern Ontario, in the Ottawa, Gatineau and St. Lawrence River valleys in Quebec, along the north shore of the Gulf of St. Lawrence and in the Atlantic Provinces, and locally in the mountainous region of Alberta.

On Vancouver Island there were deficiencies of one to two degrees. Along the coast of the mainland the mean temperatures were one degree below normal. In northern British Columbia there were deficiencies of four or five degrees while in the southern interior valleys temperatures were two to five degrees below normal.

In the extreme southwest corner of Alberta, locally in the Peace River district, and in the neighborhood of Jasper National Park temperatures were normal to two degrees above. In the Calgary, Edmonton and southern foothill regions there were deficiencies of two to six degrees while eastward to the Saskatchewan boundary and in the Athabaska River valley there were deficiencies of five to ten degrees.

In southern Saskatchewan along the International Boundary there were deficiencies of three to eight degrees and in the remainder of the province the temperatures were six to twelve degrees below normal.

Throughout Manitoba the mean temperatures ranged from six to twelve degrees below normal.

In Rainy River, Kenora and Thunder Bay districts in northern Ontario there were deficiencies of three to seven degrees. In Cochrane, Algoma, Temiskaming and Sudbury districts the mean temperatures were normal to three degrees below normal. In the region between Lakes Erie and Huron mean temperatures were little above normal while from Lake Ontario to the Ottawa valley temperatures were normal to three degrees above.

In Quebec along the upper Ottawa and Gatineau River valleys the mean temperatures were normal to two degrees above normal. Along the lower Ottawa River there was an excess over normal of one to three degrees while along the upper and middle St. Lawrence River the excess was three to seven degrees. Along the lower St. Lawrence, in the extreme southwest corner of the province, and in the Lake St. John region there were excesses of two to four degrees.

In northern New Brunswick there were excesses of one or two degrees but in the southern part of the province of two to six degrees. In Nova Scotia mean temperatures were above normal by four to eight degrees and by five degrees in Prince Edward Island.

In southeast Newfoundland excesses of three to four degrees were reported while elsewhere temperatures were normal or slightly below normal.

Along Hudson Strait deficiencies of three to six degrees were reported while along the western coast of Hudson Bay there were deficiencies of ten to fifteen degrees.

PRECIPITATION

Precipitation was generally below normal on Vancouver Island by 30 to 65% and 45% generally. Along the northern part of the Pacific coast slight deficiencies were reported while in the southern valleys there were deficiencies of about 45%.

In the Peace and Athabaska River valleys the precipitation was normal to three times the normal amount. In the upper valleys of the North Saskatchewan and Red Deer Rivers there were generally deficiencies of 15 to 50%. In the region from Calgary and Edmonton to the Saskatchewan border the precipitation was above normal by about 90% with very abnormal precipitation reported at some stations. In the Bow, Oldman and St. Mary River valleys there were deficiencies of 15 to 90% and 40% generally.

In the Battleford, Kindersley, Saskatoon region in Saskatchewan precipitation was normal to three times the normal amount. In the Qu'Appelle River valley and in the southeastern corner of the province there were excesses of 20 to 100% and 50% generally. In the remainder of the province there were deficiencies of 5 to 75%.

In Manitoba the precipitation was generally above normal in the lake region and the extreme southwest but generally below normal from the Red River westward to Brandon.

In Kenora and Rainy River districts in Ontario precipitation was 20 to 75% above normal and 45% generally. Along the north shore of Lake Superior there were deficiencies of 10 to 60% and 30% generally. In southern Algoma and on Manitoulin Island there were excesses of 15 to 90%. In Cochrane and Temiskaming districts precipitation was mostly slightly above normal but near Lake Nipissing and along the upper Ottawa River there were deficiencies of 35%. In southern Ontario excesses of 5 to 65% were reported and 40% generally except immediately along the shore of Lake Erie and the northeast shore of Lake Ontario where there were deficiencies of 5 to 20%.

Along the upper Ottawa River valley in Quebec the precipitation was 15 to 45% below normal while along the lower Ottawa River and the upper St. Lawrence there were excesses of 40% generally. In the Richilieu and Yamaska valleys, south of the middle St. Lawrence to Lake Champlain there were deficiencies of 20 to 30%. In the Lake St. John region and along the upper St. Maurice River there were deficiencies of 35% generally. In the Chaudiere valley and along the New Hampshire and Maine boundary precipitation was normal to 45% above. Along the lower St. Lawrence and north shore of the Gulf there were deficiencies of 5 to 70% and 20% on the average.

In extreme northern New Brunswick there were excesses of 5 to 25%. In the St. John River valley, the southwest Miramichi valley and generally southward to the Bay of Fundy precipitation was two to three times the normal amount for the most part. Throughout Nova Scotia there were excesses of 5 to 75% except in the southwest tip of the province where slight deficiencies were reported. On Prince Edward Island precipitation was about 75% above normal.

A. J. CONNOR

SPECIAL REPORTS

NOTE—Column H is Highest Temperature; Column L is Lowest Temperature; Column P is Precipitation in inches; Column I denotes total of bright sunshine in hours during the month; Column Tm is the mean temperature of the current month; Column Sg denotes depth of snow on ground in inches, where given.
